EDUCATION

Bachelor of Computer Application, Chhatrapati Shahu Ji
Maharaj University CGPA-7.03

FREELANCE EXPERIENCE

Aug 2025 – Sep 2025

WEB-DESIGN AND 3D ARTIST

I had the opportunity to work as a Web Designer and 3D Artist for Victor Mavin perfume brand for one month, where I was responsible for creating visually appealing website layouts and developing high-quality 3D product models. My role involved translating the brand's luxurious identity into a clean and elegant web presence, while also designing interactive elements to enhance user engagement. On the 3D side, I focused on realistic product rendering and presentation, ensuring that the perfume bottles and packaging reflected the brand's premium aesthetics. This short-term experience not only helped me strengthen my technical skills in design and 3D modeling but also taught me how to align creative work with brand storytelling, maintain consistency in visuals, and deliver assets within a professional workflow.

Tools Used: Figma, Blender

PROJECTS

My-Personal Portfolio

Oct 2025 – Oct 2025

- Developed a fully responsive personal portfolio website using React, Next.js, Tailwind CSS, and Vite.
- Created reusable and modular components to maintain a clean codebase while ensuring scalability and consistency across different sections of the site.
- Focused on delivering an engaging user experience by implementing smooth navigation, responsive layouts, and a visually appealing design.
- Optimized performance and SEO during deployment, ensuring fast load times and better visibility for recruiters and collaborators.

Technology used: TailWind Css, React, LucidReact, Vite.

Adobe-Ui Clone

Jan 2025 – Jan 2025

- Built a pixel-perfect clone of the official Adobe landing page using only HTML and CSS, focusing on replicating the layout, typography, and design aesthetics.
- Practiced modern CSS techniques like flexbox, grid, and responsive design to ensure the page adapts smoothly across different screen sizes and devices.
- Strengthened understanding of semantic HTML structure while organizing code for better readability and maintainability.
- Enhanced attention to detail in UI/UX design by closely analyzing and recreating a professional brand website, improving both visual accuracy and coding discipline.

Technology used: TailWind Css, React, LucidReact, Vite.

TECHNICAL SKILLS

Programming Languages

C,C++,Java,Javascript,Sql,Python, C

Development/Frameworks

HTML, CSS, React.js,
Express.js,Tailwindcss, Material UI
MongoDB, Node.js
Three.js Next.js

Software Development Tools

Git,GitHub,Visual Studio Code

Designing-Tools Figma Blender
After Effects

Soft Skills

Strong Communication, Problem
Solving, Interdisciplinary
Collaboration, Leadership

Programming Concepts

Object-Oriented Programming
(OOPs), Data Structures and
Algorithms (DSA)

Leetcode - 100+ solved

CERTIFICATES

- UI/UX for Beginners Certification - by Great Learning, Front-end Development Certification by - Great Learning
DSA By Striver and Love-Babbar, Three.js Journey by Bruno Simon

ACHIEVEMENTS

Solved 100+ problems on leetcode | 2k Followers on Linked in | max-1475 rating on leetcode contest | 3rd in Poster Competition in School
